Higher secondary
- Marks : 81.6%

Projects

PetNation with petcoin

Github Repo
- Developed and implemented an innovative application enabling users to upload photos of stray animals for adoption and donation
- Created a payment system using Razer Pay, where users purchase petcoins instead of cash, which can be used exclusively for animal-related purchases at authorized pet shops and pet care providers under the Petnation platform.
- Recognized for the application's excellence by receiving the Best Idea **Award at DevJams'21**, by the VIT's Google Developers club.

My Music Wiki

Github Repo
- Designed and developed a music application similar to Wikipedia utilizing the Last.fm API, using REST API and Volley technology
- Enabled smooth navigation by allowing users to seamlessly redirect to details pages for genres, artists, and albums

Live Coupon Bazar.

Github Repo
- Built an application that allows users to buy and sell coupons or vounchers in real-time.
- This project is a **finalist in HackX hackathon**, conducted by IEEE-VIT.
